

iAuditor Mobile-First Inspections Platform

Paper or spreadsheet based inspection systems are inefficient and do not allow real-time trends to be analysed at a glance. With SafetyCulture's digital tools and platform, your teams can carry out inspections and spot issues quickly and easily.

The knock-on effects are huge: by surfacing exactly what matters, your people in their teams can act to improve the business, increasing safety performance, raising your game again and again.

Did you know?

- Since SafetyCulture developed iAuditor, their customer's safety incidents have reduced by an average of 23%.*
- The time taken to produce an inspection report can be reduced by 8 times with a digital inspections tool.**

How can Aviva help?

At Aviva, we can provide health and safety audits via our Specialist Partner, SafetyCulture, using their comprehensive software-as-a-service audit inspection application, iAuditor. Services include:

- Audits and inspections
- Managing maintenance
- Controlling contractors
- Using sensors to monitor environmental conditions

This is best deployed as a managed service co-ordinated and project managed by the Aviva Risk Consultant.

Speak to your Risk Consultant about utilising Aviva developed templates to capture data on the highest risks in your industry or contact SafetyCulture for any further enquires. Preferential rates are available to Aviva customers.

What are the benefits to the customer?

- Gain visibility over safety and quality performance across your entire business
- Mitigate incidents by spotting problems sooner and taking corrective action
- Improve your risk profile
- Digitise existing paper and excel processes to save time and money
- Additional tailored templates developed by Aviva

iAuditor by SafetyCulture

iAuditor is trusted by over 27,000 companies as their mobile inspections tool to capture what is working in the business, what isn't and what to do about it.
